|---|----------------------|
| Condition 10 | Permits-NPDES |
| <p>Prior to construction, an NPDES Construction Activity Storm Water Permit shall be obtained. Appropriate BMPs, as established in the project NPDES Construction Storm Water Permit, shall be employed during project construction, which may include, but are not limited to, temporary sand bagging; construction of berms; installation of geofabric, and revegetation of areas by hydroseeding and mulching; actions for control of potential fuel or drill tailing release; the use of trench stabilizing and de-watering and requirements for disposal (i.e., location, quality) of water from dewatering activities. The NPDES permit shall apply to all proposed facilities, and shall address 50 to 100-year precipitation events to the extent feasible. Any erosion and sedimentation control netting or other erosion and sedimentation control devices used for temporary or permanent erosion and sedimentation control, shall be limited to biodegradable mesh or other biodegradable products.</p> | |
| <p>Evidence of compliance:</p> <p>Compliance with Condition 10 is satisfied by the project specific SWPPP's. Please refer to COA #19 for SWPPP sheets.</p> | |

Condition Satisfied
